YASH CAPACITORS PVT. LTD

YASH CAPACITORS PVT. LTD.

SUNNY CAPACITORS

Company Profile: (Sunny Capacitors)

YASH CAPACITORS PVT. LTD. is a pioneer in the manufacturing and supply of all types of LT Capacitors, boasting over four decades of experience in the industry.

Founded in 1983 by the late Mr. Shirish Anand Jalgaonkar, with his rich experience in the Electrical Engineering field, Yash Capacitors Private Limited was established to provide quality capacitors under the brand name **SUNNY**.

Today, SUNNY capacitors hold the highest market share in India for Power Factor Correction Capacitors, Fan & Motor capacitors, Harmonic Filter Reactors, Line Reactors, and Chokes. We are also a leading supplier to most prominent manufacturers across the country. A significant volume of our PFC capacitors and Reactors are exported to various international markets, including South Asian Countries, the Middle East, Turkey, and Vietnam.

We proudly export to over 10 countries worldwide, specializing in manufacturing high-quality products with minimal delivery times. We are currently an INR 350+ Million company, having achieved a remarkable sales growth rate of around 300% in the last four years.

Our extensive in-house manufacturing and testing facilities ensure confidence in our product performance. Operationally, we are spread across two manufacturing units, covering more than 6500 sq. m. and 2500 sq. m. respectively, each dedicated to manufacturing, assembly, and testing. Our experienced and technically sound team of over 200 members helps us deliver highly reliable products.

We serve as an import substitute channel for Indian Railways for Capacitors and Transformers, holding all necessary performance and approval certificates. Furthermore, we are a trusted vendor for numerous OEMs, including Havells, Crompton Greaves, CG Power, Franke Faber India, Schneider Electric Ltd. (now Lauritz Knudsen), Harmonizer, and KSB Pumps, as well as many other Indian Railways contractors.

We pride ourselves on our expertise in **product customization**, designing solutions precisely as per customer requirements.

SUNNY CAPACITORS
Yash Capacitors Pvt. Ltd.

Our Leadership:

At **Yash Capacitors Pvt Ltd.**, our vision is steered by a team of experienced and dedicated leaders committed to innovation, excellence, and sustainable growth. Their collective expertise and forward-thinking approach are the driving force behind our success and our commitment to delivering exceptional value to our customers.

Management Director

Mr. Rohit Ravindra Sule.

As the **Management Director** of **Yash Capacitors Pvt Ltd**, Mr. Rohit R. Sule plays a pivotal role in overseeing our day-to-day operations and strategic implementation. With 25 years of extensive experience in Electrical, Electronics and Instrumentation Engineering brings a robust understanding of Design, Power Quality Solutions, Marketing, Sales and Business Development etc.

Mr. Rohit R. Sule's leadership is characterized by a strong focus on team empowerment, a commitment to quality, a drive for continuous improvement. He is instrumental in streamlining our production processes, fostering a culture of innovation, ensuring stringent quality control measures. Under his guidance we consistently achieve our operational goals/we uphold our commitment to customer satisfaction.

Chief Executive Officer (CEO)

Mrs. Renuka Rohit Sule.

As the **Chief Executive Officer (CEO)** of **Yash Capacitors Pvt Ltd** Mrs. Renuka R. Sule is responsible for setting the company's overall strategic direction and long-term vision. With a distinguished career spanning over 20 years in Electrical Engineering field, She possesses a profound insight into Global market trends, technological advancements, strategic partnerships.

Mrs. Renuka R. Sule's visionary leadership has been critical expanding our market reach/driving our exponential growth/pioneering new product lines]. She is dedicated fostering innovation, ensuring sustainable practices, building strong client relationships] and inspiring our team to achieve new heights. Under her strategic guidance, Yash Capacitors Pvt Ltd continues to strengthen its position as a leader in Capacitor manufacturing and explore new frontiers for growth and development.

Quality:

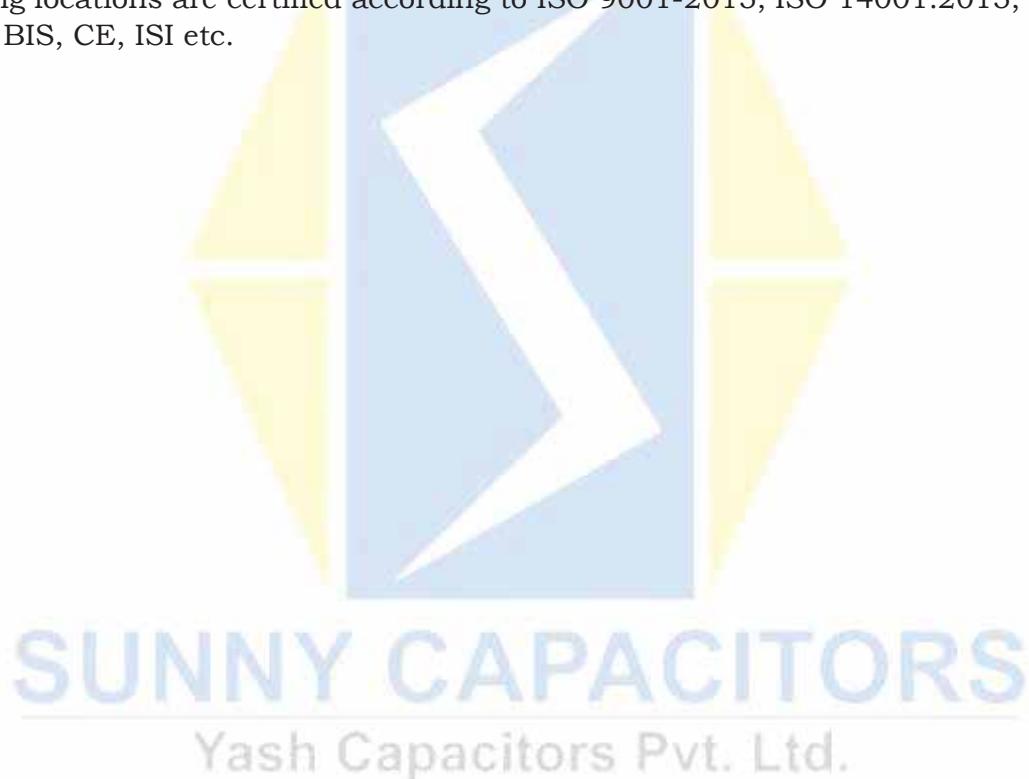

'Sunny' is well known brand of capacitor in India for its performance, reliability and durability. The quality of our product has been a key driver of our growth and prominence in capacitor industry.

The founders and key personnel have over 40 years of consolidated international experience in design, development and manufacturing of Power Factor Capacitors, Harmonic Filters reactors, Power Factor Correction Equipment, Measuring devices and Energy Management Systems.

Our innovative products are designed and built on sound engineering principles with total quality and customer satisfaction as a guiding rule.

We are committed to delivering a positive value to each and every client, backed by our dedication to the highest standards of client satisfaction, reliability and integrity.

All our products are manufactured to the highest prevailing international standards & the manufacturing locations are certified according to ISO 9001-2015, ISO 14001:2015, ISO: 45001:2018, BIS, CE, ISI etc.

OUR PRODUCTS

F

**HARMONIC FILTER
DETUNED REACTORS**

We are dedicated to providing reliable and innovative products and solutions in the fields of Reactive Power Compensation and Power Quality Energy Management to customers worldwide. Our founders and key personnel bring over 40 years of consolidated international experience in the design, development, and manufacturing of Power Factor Capacitors, Harmonic Filter Reactors, Power Factor Correction Equipment, Measuring Devices, and Energy Management Systems.

High-Performance Capacitors: The Hyper Heavy-Duty Capacitor (SHDC) Series

The **Hyper Heavy-Duty Capacitor (SHDC) type Power Factor Capacitor** represents a highly reliable and optimized solution for Power Factor Correction. These high-performance capacitors are available with outputs ranging from **0.25 KVar to 50 KVar**.

The SHDC series features a 3-Phase integrated capacitor design, specifically engineered for Power Factor Correction in demanding Commercial and Industrial applications. These capacitors incorporate a unique **Metalized Polypropylene film** as the dielectric, ensuring an exceptionally long working life with minimal losses.

Advanced Construction & Process

SHDC series capacitors are **Self-Healing**, meaning they can restore themselves in the event of a dielectric fault, which can occur during high overloads or voltage transients. The electrode layer, a special metal alloy, is vacuum-deposited onto the polypropylene film dielectric. Each 3-Phase capacitor is internally composed of three single-phase capacitor windings, assembled in an optimized geometric design. The special metal alloy electrode layer is connected in parallel using a specialized **Metal Spraying technology**.

This unique process, combined with the electrode's design, enables the capacitor to withstand high peak current levels. Capacitor elements undergo a meticulous **high-vacuum process** to eliminate all moisture and impart the correct level of thermal stability. This critical step prevents oxidation and partial discharges during the capacitor's operational life, ensuring superior capacitance stability. The capacitor elements are encapsulated in a specialized synthetic material, providing enhanced dimensional stability and efficient thermal conduction of heat from within the capacitor.

The entire capacitor assembly is robustly housed in an **extruded cylindrical aluminum case** and sealed using a specialized **double-seaming technology**. Our capacitors are manufactured with a **burst-proof mechanism** that protects other panel components from damage in the unlikely event of capacitor failure, ensuring it punctures safely on the spot.

Triple Safety System

The SHDC Capacitor technology is equipped with a comprehensive **triple safety system**:

- **Self-Healing:** As mentioned, this process allows the capacitor to automatically restore itself after a dielectric breakdown.
- **Pressure Sensitive Disconnector:** Integrated into each phase, this mechanism ensures safe disconnection and electrical isolation at the end of the capacitor's operational life.
- **Finger-Proof Assembly of Cover:** Designed for enhanced safety during handling and installation.

Superior Termination Design

The SHDC Capacitor incorporates a highly reliable **two-way termination design**, utilizing robust copper and brass terminal clamps. Additionally, large-sized clamping screws are employed to ensure proper torque application on the connecting cable. This superior terminal design offers significantly longer and more reliable performance compared to conventional termination technologies.

Discharge resistor modules are available in a completely integrated design, allowing for easy fitting onto the capacitor. The capacitor's terminal design also permits the banking of multiple capacitor units within their permissible current-carrying capacity.

The SHDC series stands as an optimal combination of cutting-edge technology and ergonomic design, offering our customers unparalleled performance and reliability.

Technical Specifications:

(for Power Factor Correction Cylindrical Capacitors)

Range: 0.25 KVA to 50 KVA (230 Vac to 690 Vac)

Available in Standard Duty, Heavy Duty, Hyper Heavy Duty

- Features:**
- 1) Compact Cylindrical Design for LT Applications. (AL Can)
 - 2) Inbuilt pressure sensitive Interrupter to ensure maximum safety.
i.e. Explosion proof design
 - 3) Low Internal Power Losses, High Insulation Resistance
 - 4) Made with Self-Healing Metalizing film.
 - 5) Delta Connected.
 - 6) Very Low Power Loss.
 - 7) High Temperature withstand Capacity.
 - 8) Non-PCB dry resin
 - 9) Eco-friendly.
 - 10) All Products are tested by world Renewed lab CPRI.
 - 11) Safe Touch Shock Proof Terminals.
 - 12) Easy to Banking
 - 13) Vertical Mounting
 - 14) Special Sizes and Ratings (Customised) Capacitors can be available.

Applications: APFC Panel, Wind Turbines, Furnaces, industrial establishments.

Manufacturing Capacity: 1,000-2,000 Nos Per Day

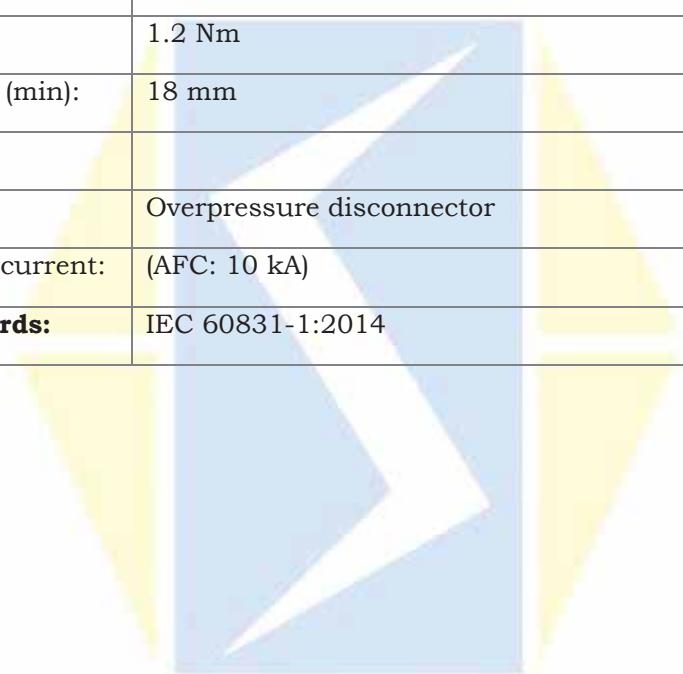

SUNNY CAPACITORS

Yash Capacitors Pvt. Ltd.

A.	Description:	MPP Type PFC Capacitor
01	Construction:	Dielectric: Polypropylene film Non-PCB, dry resin Extruded round aluminium can with stud Provided with discharge device Over pressure disconnecter
02	Features:	Three phases, delta connected Self-healing technology Naturally air cooled (or forced air cooling) Indoor mounting
03	Typical applications:	For Power Factor Correction
04	Terminals:	Optimized capacitor safety terminals
05	Mounting parts:	Threaded stud at bottom of can (max. torque = 10 Nm for M12)

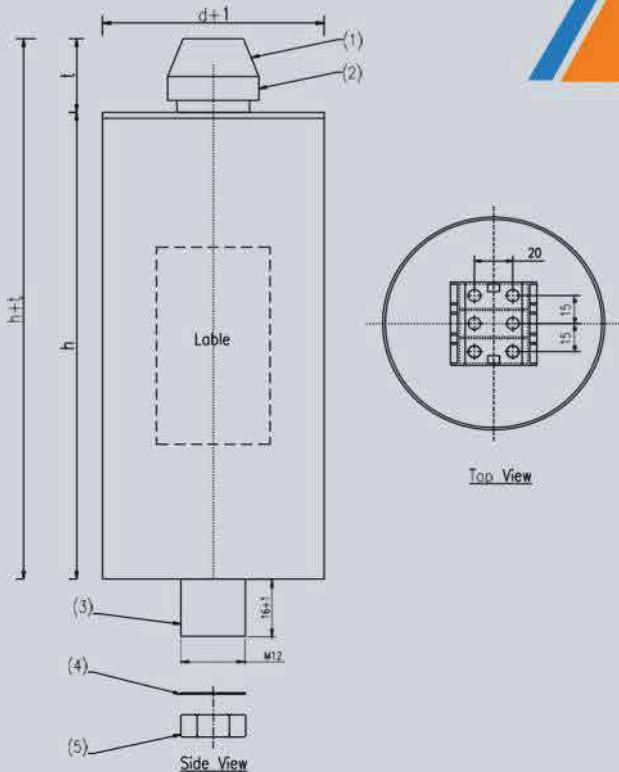

B.	TECHNICAL DATA AND SPECIFICATIONS:	
01	Characteristics:	
	Rated capacitance CR:	$3 \times \mu\text{F}$
	Tolerance:	-5 / +10 %
	Connection:	D (Delta)
	Rated voltage (Un):	230 Vac to 690 Vac
	Rated frequency (Fn):	50/60 Hz
	$\tan \delta$ (dielectric):	0.2 W / kvar
02	Maximum ratings:	
	(Maximum Permissible Voltage) V max	(up to 8 h daily): $1.1 \times \text{Un V AC}$
	Maximum Permissible Voltage) V max	(up to 1 min): $1.3 \times \text{Un V AC}$
	(Maximum Permissible Current)	I max: $1.5 \times \text{In (A)}$ (including combined effects of harmonics, over voltages and capacitance tolerance)
	Is (IN RUSH CURRENT):	$300 \times \text{In (A)}$
03	Test Data:	
	Voltage Test Between Terminals (Ut)	$2.15 \times \text{Un} / 50 \text{ Hz}$ during 2 s
	Voltage Test Between Terminal to AL CAN (Vtc)	$2 \times \text{Un} + 2 \text{ KV or } 3\text{KV} / 50 \text{ Hz}$ during 10 s
	* $\tan \delta$ (50 Hz) * Without discharge resistor	$\leq 0.5 \text{ W / KVar}$

04	Mean Life Expectancy	150,000 Operating hours at 65°C
05	Temperature Category	-25°C to 65°C
06	Design data:	
	Impregnation:	Non PCB, dry resin
	Fixing:	Threaded bolt M12
	Max. torque (Al can stud):	10 Nm
	Mounting position:	Upright
07	Terminals:	8 MM Stud Type or Screw Type
	Degree of protection:	Isolated terminals, IP 20
	Max. torque:	1.2 Nm
	Creepage distance (min):	18 mm
08	Safety:	
	Mechanical safety:	Overpressure disconnect
	Max. short circuit current:	(AFC: 10 kA)
09	Reference standards:	IEC 60831-1:2014

B FAN CAPACITORS:

Range: 0.5 MFD to 6 MFD

Specifications: 230Vac to 600Vac, 50/60Hz

Available in PP (Round & Square Shape) and AL Can with wire and Terminal

Features: 1) Made with Self-Healing Metalizing film.

2) Can Operate with Same efficiency with Variable Temperature Range.

3) Low Internal Power Losses, High Insulation Resistance

4) Class A, B, C

5) Available with ISI and CE Certification Markings.

6) Special Sizes and Ratings (Customised) Capacitors can be available.

Applications: Ceiling Fan, Table Fans, Pedestal Fans, Exhaust Fans.

Manufacturing Capacity: 1,00,000 Nos Per Day

C MOTOR RUN CAPACITORS:

Range: 5 MFD to 120 MFD

Specifications: 230Vac to 525Vac, 50/60Hz

Available in PP (Round) and AL Can with wire and Terminal

Features: 1) Made with Self-Healing Metalizing film.

2) Can Operate with Same efficiency with Variable Temperature Range.

3) Low Internal Power Losses, High Insulation Resistance

4) Class A, B, C

5) Specially Designed Capacitors for Submersible Pumps.

6) Available with ISI and CE Certification Markings.

7) Special Sizes and Ratings (Customised) Capacitors can be available.

Applications: Single Phase Motors, Mono Blocks, Submersible Pumps, Industrial Blowers etc.

Manufacturing Capacity: 25,000 Nos Per Day

D MOTOR START CAPACITORS:

Range: 40-60 MFD to 250-300 MFD

Specifications: 230Vac to 275Vac, 50/60Hz

Available in PP (Round) and AL Can with wire and Terminal

Features: 1) Made with Self-Healing Metalizing film.

2) Can Operate with Same efficiency with Variable Temperature Range.

3) Low Internal Power Losses, High Insulation Resistance

4) Class A, B, C

5) Specially Designed Capacitors for Submersible Pumps.

6) Very Low Power Loss

7) Special Sizes and Ratings (Customised) Capacitors can be available.

Applications: Motor Starters, Mono Blocks pump sets, Submersible Pumps, Industrial Blowers, Refrigeration's and Compressors etc.

Manufacturing Capacity: 25,000 Nos Per Day

Range: 2.5 to 80 MFD, 25+2 to 80+7.5 MFD

Specifications: 370Vac to 450Vac, 50/60Hz

BURST PROOF DESIGN in AL Can with Terminal (4+4+4, 4+4+2, 2+2+2)

Features: 1) Made with Self-Healing Metalizing film.

2) Inbuilt pressure sensitive Interrupter to ensure maximum safety.

3) Low Internal Power Losses, High Insulation Resistance

4) Class A, B, C

5) Highly Reliable Tin-Plated Terminals

6) Very Low Power Loss

7) Can Operate with Same efficiency with Variable Temperature Range.

8) Special Sizes and Ratings (Customised) Capacitors can be available.

Applications: Refrigeration's and Compressors etc.

Manufacturing Capacity: 5,000 – 7,500 Nos Per Day

Technical Specifications:

(for Fan Capacitor, Motor Capacitors and Air Conditioning Capacitor)

A. Description:		MPP Type Motor Run-Motor Start Capacitor
01	Construction:	Dielectric: Polypropylene film
02	Features:	Self-healing technology
03	Typical applications:	Fan Capacitor
04	Standards:	IS 2993:2024 (Part: 1 & 2), IS 2993/IEC60252- 1 & 2

B. TECHNICAL DATA AND		SPECIFICATIONS:
	Rated capacitance CR:	Fan, Motor Run: 0.2 to 120 MFD Motor Start: 40-60 to 250-300 MFD
	Tolerance:	-5/+10%
	Rated voltage VR:	230-600V AC
	Rated frequency F:	50/60 Hz
	$\tan \delta$ (dielectric):	≤ 0.0025
	Dielectric	MPP Film
	Temperature Range T min (-) T max (+):	5 °C to 85 °C
	Endurance Test	200-6000hrs at 1.25 Times Rated Voltage at 85 °C
	Between Body & Terminals	twice the rated voltage +1 000 V but not less than 2 000 V)
	Between Terminals Voltage	2.00 Times of Rated Voltage
	Dimensions ($\varnothing \times L$):	As per requirement
	Case	Plastic Body + Aluminium Body
	Impregnation:	Non-PCB, Semi-dry biodegradable resin
	Mounting position:	Upright and Horizontal

Range:

- a) Harmonic Filter Reactors (Copper, Aluminum Strip and Aluminum Foil Wound)
1 KVAr – 100 KVAr UP TO 690V
- b) Shunt Reactor (Copper and Aluminum Strip Wound)
1 KVAr – 100 KVAr UP TO 440V 1 PH & 3 PH

Features:

1. High Harmonic Loading Capacity.
2. Low Losses.
3. Convenient Mounting
4. Temperature protection (NC Contact)
5. High Class Copper, AL Flat & AL Foil used.
6. Vacuum Impregnation which ensures they can withstand high Voltage, have Low noise & offer a long operating Time.
7. High Class Iron Core with multiple Air Gaps as well as staid design approach. Guarantee high Current Linearity & Low heat dissipation Losses.
- 8) Special Sizes and Ratings (Customised) Capacitors can be available.

Technical Specifications:

1. Description : Three-Phase Dry Type Magnetic Circuit Impregnated
2. Standard : IS 5553-5 IEC60076-6
3. Degree of Protection : IP00
4. Insulation Class : F & H
5. Rated Voltage : 400 to 690 Volt- 50 Hz. 400 to 690 Volt- 60 Hz.
6. Detuning : 5.67 %, 7 %, 14%
7. Cooling Type : Natural
8. Ambient Temp. : 55 degree cel.
9. Temperature protection : Thermal Switch (NC)
10. Inductance Tolerance : ± 5%
11. Dielectric Test 50Hz/60Hz Bet. Winding & Winding to body : 3KV for 1 Min.

Installation Guideline:

1. The detuned reactor always requires forced ventilation system.
2. Mounting of reactor should be in zig zag manner so that heating of one reactor should not affect another reactor.
3. Install the reactor in vertical position.
4. Ensure that the ambient temperature installation does not exceed beyond 55°C (inside the panel).
5. Reactor should be earth to earth point.

Dimension Details:

400-440V, 7 %, 50/ 60 Hz Aluminum Flat Type Detuned Reactor
